

OPEN INNOVATION PLATFORM Agro

Do you want to become our innovation partner?
Send your compounds to us!

 **BASF**

We create chemistry

OPEN

INNOVATION PLATFORM Agro

- 1** Contact us at oipAgro@basf.com. Share your compound structures with us. We will carry out *in silico* evaluation. If your compounds fit our profile, we will ask you to send us physical samples.
.....
- 2** Compounds will be assessed by *in vivo* screening as potential herbicides, fungicides and insecticides. Hits in these screens may also be included in our philanthropic public health programs against human pathogens.
.....
- 3** In return, we will provide you with the biological results generated from the *in vivo* testing at BASF, which can be freely used for scientific publications.
.....
- 4** A further collaboration may be developed, based on interesting results generated in the preliminary screening.
.....
- 5** The confidentiality of your structures is assured.
